The Honorable Josh Shapiro

November 15, 2023

Dear Governor Shapiro,

The statement of mutual interest with CNX you announced in Washington County on November 1 is viewed as anything but a victory to the countless people who have suffered at the hands of drillers, including CNX, for years or who are concerned about the state’s inaction on the climate crisis. Nick Deiuliis makes no secret of his extreme positions on climate change and shale gas development. His own website includes a disclaimer that the positions he states are his own and not those of his company, yet he is the person whose name is on the document establishing the voluntary agreement.

Here are just a few of his statements:

On his mission - “An ecosystem of parasitic elites games the system and exists solely to appropriate and consume the fruits of the doers’ labor. Those falling within its sway include swaths of the government bureaucracy, the media, and NGOs/foundations.”

On the DOH/Pitt studies - “A ground game is churning that fabricates a storyline of the natural gas industry hurting residents: causing asthma, causing childhood cancers, and adversely impacting newborns. Making and broadcasting disgusting and baseless accusations to vilify and take down a noble and societally crucial endeavor, and in the process hurting the very region and communities the opportunists claim to work in the interest of.”

Deiuliis is, incidentally, on the board of the University of Pittsburgh’s Hillman Cancer Center. Members of the Hillman team were among the study’s authors.

On climate change - “[Jane Fonda] mentions ‘bomb cyclones’ in California. Ironically, she points to the Texas freeze of 2021 and New England blizzards as signs of global warming, err, climate change (isn’t the term ‘climate change’ so much more accommodating to the religion of radical environmentalism than ‘global warming’?)”

And this - “Shout out to UN carnival barker Guterres who quipped, ‘We are on a highway to climate hell.”’

It is impossible to quantify the damage you do, Governor Shapiro, to the people you were elected to serve when you align yourself with someone who trivializes and even vilifies their experiences and concerns.

You claim to be entering into this dubious agreement in the interest of gathering data in a process you said you believe will provide the public with some measure of protection. When the data don’t support Mr. Deiuliis’ views, will he opt out of sharing them? Regardless, we find no value in collecting more very limited data when plenty of data already exist - including data from your own Department of Health in the study Mr. Deiuliis discredits - that point to an intensifying public health crisis occurring in tandem with a climate crisis we are rapidly running out of time to address. We call on you to rescind your agreement with CNX. We challenge you to be the leader this precarious moment demands.

You said “we must reject the false choice between protecting jobs and protecting our planet and public health. I believe we can do both.” We agree. In fact, we have been calling for a just transition for workers
because we know that the transition away from fossil fuels will occur because it must and we do not want workers to be left behind. This pro-labor position we are advocating would provide more protection for workers who deserve employment in family-supporting jobs that don't make them or their families sick. You are pro jobs; we are pro workers.

You used your press conference to reiterate that you are an “all of the above” governor and to insist that the fossil fuel energy sector will continue to play a key role in Pennsylvania. Once “all of the above” included renewables. Now, sadly, it seems you have removed renewables from the equation, leaving fossil fuels to play the major role, possibly indefinitely. “All of the above” now appears to mean that you’re giving a barely perceptible turn to the regulatory screw with one hand, while, with the other, giving an industry that you know full well is harming both public health and the environment free reign to clear its name.

The “radical transparency” you and CNX promise is anything but. With its own reputation at stake, and with no independent assessor involved in the gathering, interpretation and dissemination of its drilling data, this information will not be publicly available and CNX will be able to continue to bring harm to the very public you have explicitly promised to protect – and they will do this without any accountability. It’s important to remember that CNX became the harbinger of the fracking industry in Pennsylvania with their first fracking wells popping up in the mid 2000’s. They continue to represent the worst of the industry with their history of spilling natural gas production fluids and abandoning wells in recent years. This is not a history that inspires public trust.

While CNX made statements that they will prove unequivocally there are no adverse impacts from these operations, we have seen from prior years that fracking has serious health consequences for the communities around it, as well as those hundreds of miles away. The University of Pittsburgh studies on asthma, birth outcomes, and childhood cancer, as well as the compendium of harms of fracking and oil and gas infrastructure prove the indisputable harm caused by this industry. Even the effort by the so-called Center for Sustainable Shale Development, which was touted during the press event, was reviewed by experts and shown to be wholly ineffective - in fact, that attempt to soft-sell fracking ended up as an epic failure due to industry resistance and misinformation.

These are the well-founded facts that your alliance with CNX ignores. Halfway measures to lighten the devastating imprint of gas extraction will not undo the new legacy of harm that CNX will bring, with your sanction, as they continue to drill and frack.

You have the chance to be the governor who leads us through the transition by deploying renewable energy and sustainable solutions and, in the process, creating a new generation of family-sustaining jobs, not temporary construction jobs building infrastructure that will become stranded assets almost right out of the box.

We believe you have the obligation to be that governor.

Karen Feridun, Co-Founder, Better Path Coalition, on behalf of the undersigned
